

Lumax, DK Jain Group is a leading manufacturer of automotive components and systems in India, supplying to virtually every vehicle manufacturer in the country. With a large range of automotive components, the Group has a sales turnover of INR 2950 crore. In 1945, the Group started its operations with the establishment of Global Auto Industries – as a trading concern and set-up manufacturing of Lighting equipment in 1956. The name LUMAX is synonymous with Lighting today, in the Indian market.

Today, the Group comprises twelve companies with 27 manufacturing locations spread in seven states across the country, having 3, government recognized R&D centres and one overseas Design centre in Taiwan.

The key asset of the Group is its dedicated workforce of over 9000 people. The Group lays great emphasis on the development of its employees through training programmes, conducted by its in-house development centre – ‘GURUKUL’. On the whole, the strength of the Lumax Companies lies in their strong product development capability, large product range, excellent quality, extensive Original Equipment coverage, export markets, and JIT Systems, technology upgradation and international tie-ups. Additionally, the Group’s capability to set up the state-of-the-art and highly productive plants with in-house expertise, gives it a competitive edge.
