Commenting on the performance Mr. Deepak Jain, Chairman & Managing Director, Lumax Industries Limited said

“Q2 has been a challenging quarter for the Industry with production shutdowns at many OEMs. However, few new launches have done exceptionally well and our dominant position in lighting industry has resulted in being a key beneficiary.

It was widely anticipated for the pace of slowdown to recede and the current festive season in October provided some relief with improvement in retail sales. This has resulted in reduction of dealer inventory to some extent. Despatches remained strong in other segments including the luxury segments, except for the CVs.

Investor Release

With implementation of various new regulations in times to come, we foresee healthy demand for our lighting solutions and the transition from conventional lighting to LED also augurs well for the Company.

The Company has always been proactive in adoption of new technologies and consequently been able to deliver quality and technologically advanced lighting products to its customers. We remain at the forefront of developments occurring in the industry and a partner of choice by the OEMs”

About Lumax Industries Limited:
