The Center is aimed at imparting knowledge and training on efficient industrial production systems and creating Intellectual property, ACMA said in a release.

New Delhi: Indian auto industry body automotive component manufacturers association [ACMA](#) on Thursday unveiled two new labs its Centre of Excellence - [Saksham](#), at IIT Delhi Campus in Sonipat to develop engineering skills and capabilities of the auto component manufacturers.

Built with the current investment of Rs 4.5 crore the two state of art labs - [Mechatronics lab](#) and [Design lab](#) will deliver the technical know how of automation and new technologies to the industry members.

The Center is aimed at imparting knowledge and training on efficient industrial

production systems and creating Intellectual property, ACMA said in a release.

Deepak Jain, President, ACMA said, “The automotive industry in India and the globe are undergoing tremendous technological changes on the front of emissions, safety and environment. To remain globally competitive and relevant to customers, it is imperative for Indian auto component industry to ensure that our shop floors as well as our product are on the cutting edge of technology. It is in this context that we are opening two labs at Saksham, the ACMA centre for excellence.”
